Donation Confirmation

Thank you very much for your generous donation on July 25, 2017 to the Turtle Foundation

Dear Mr Jan Pasboel

Thank you very much for your generous contribution. We are very happy and honored to receive your support!

Your donation helps to preserve the enchanting but highly endangered sea turtles for the future. For, as you already know, it is human activity that in recent times has been the most destructive to our natural resources and heritage. The activities that threaten sea turtles, in particular, include hunting, large-scale collection of eggs, pollution, fishing and the loss of nesting areas on the beaches, with the addition of immeasurable consequences of climate change. Sea turtles have successfully inhabited the earth since the time of the dinosaurs, which makes their rapid decline all the more tragic, and which is having a noticeable effect on the sensitive ecosystems of the oceans. Only by conscious action and intervention by people like you can this destructive trend be stopped.

The Turtle Foundation protects sea turtles through our own projects in two very important nesting areas on the Cape Verde Islands of West Africa and the Derawan archipelago off the coast of East Borneo in Indonesia. There, we protect hundreds of thousands of turtle eggs, and thousands of adult sea turtles every year, directly against human depredation. With information campaigns and local development cooperation, we promote the sustainability of our protection efforts. We also help support other local sea turtle protection programs.

These enterprises are very costly and would not be possible without the donations and support of our sponsors, and also of individuals like you. Thanks again for your support.

With kind regards

TURTLE FOUNDATION (... because extinction means forever!)

Dr. Frank Zindel
